Our Mission

Fortin Ironworks builds quality and value into every gate we fabricate. Our complete line of gates are constructed with quality materials and skilled craftsmanship to fit any budget. We weld all gate components to the gate frame rather than using fasteners that eventually loosen. We also employ stylish hand forged embellishments for an old world look of quality. When purchasing a **Fortin Ironworks** gate, you can be confident that you are making a sound investment for your home or business.

photo: ww-03

This literature is designed to be a guide to help you decide what gate style and design options best fit your needs. Every gate is based on a layout, as noted on each individual gate style. Gate styles shown are 3 feet wide by 4 feet tall for single leaf gates and 5 feet wide by 4 feet tall for double leaf gates. Single leaf and double leaf gates use a heavy gauge (3/16") 2" square tubing post. Every gate is welded together at every joint allowing for a stronger durability. Gates are primed and painted black. An upgrade of premium finishes will include a sandblasted preparation and a custom colored powder coat finish with multiple coats. Gate styles and prices may vary as length and height ratios change. Custom gate panels are available to improve layout spacing as necessary. Due to the nature of custom iron products, the prices detailed in this literature may change according to your specifications. For exact prices, please fax, mail, or bring a gate estimator your layout drawing with dimensions.

Fortin Ironworks walk gate size standards:

- Single Leaf Gate - 4' wide x 6' tall
up to 24 square foot
- Double Leaf Gate - 8' wide x 6' tall
up to 48 square foot

Prices shown include:

- 2 posts - hinge post & latch post
or
- hinge bar & surface mounted catch
• spring latch or slide bolt
